

MOBILE TICKETING

SMSTurbo works with doForms to provide mobile ticketing solutions.

SOLUTION BRIEF

About doForms

Mobile forms by doForms simplify the way organizations of all sizes collect, integrate, and share data. You can quickly collect information, signatures, and payment in the field on smartphones and tablets and automatically send information to the office via the cloud.

doForms and SMSTurbo for Mobile Ticketing

SMSTurbo integrates with doForms to provide additional capabilities for your staff. On-site and off-site, doForms enables ticketing with mobile devices and cellular-enabled tablets.

Benefits of SMSTurbo Integration

TICKETING

- Send SMSTurbo ticket data to mobile devices and cellular-enabled tablets
- Drivers collect information on-the-go with a paperless solution
- Capture electronic signatures from customers at their location
- Record date/time stamps for delivery
- Document GPS coordinates for drop-off location
- Attach photographs of customer, load, site, etc.
- Enter recipient name, notes, and additional order information
- Update ticket data in SMSTurbo immediately

DISPATCHING

- Push ticket data to a mobile device and notify drivers
- Provide details about order description, ID, material, quantity, and unit of measure
- Include customer information; name, address, phone number and more.
- Launch Google Maps and lookup directions to the delivery location

About CIS

Creative Information Systems is a recognized leader in the scale management industry, providing inventive ticketing solutions since 1984. Our knowledge and experience spans scale operations in diverse markets throughout North America.
